SEIF ELDIN MAGDY

AI Automation Engineer

Cairo, Egypt +20 103 230 1529 seifmagdyyoussef@gmail.com LinkedIn GitHub

PROFESSIONAL SUMMARY

AI Automation Engineer at Pollion since April 2026, focused on AI agents, n8n workflows, UiPath RPA and enterprise integration. Builds connected business workflows using prompt engineering, APIs and document processing. Previously worked in data science; now applies that Python and machine learning foundation to agent workflows, RAG and automation with security and human review.

EXPERIENCE

AI Automation Engineer Apr 2026 – Present

Pollion

- Develop AI agents for project reviews, scoring explanations and client context through Pulse.
- Build n8n workflows for company research, contact enrichment, verification and lead delivery.
- Develop internal tools for attendance, working hours, leave management and operational reporting.
- Connect business tools through APIs and webhooks to reduce repetitive manual work.

Integration & Automation Engineer (Intern) Jan 2026 – Apr 2026

Worex Technology

- Connected ATM, mobile and web banking channels using IBM ACE v12/v13 and REST-to-SOAP transformations.
- Applied OAuth 2.0, TLS and API-key security through IBM API Connect and DataPower.
- Built audit logging, error handling and alerts; connected IBM MQ and Kafka for transaction flows.

Data Scientist (Intern) Aug 2025 – Nov 2025

InternBoot · Earlier data-science experience

- Built machine learning pipelines with Python, TensorFlow, PyTorch and Scikit-learn for predictive analytics.
- Automated preprocessing, feature engineering and model evaluation with pandas and NumPy. Achieved grade A.

Judge — Code Challenge Championship Aug 2025

- Evaluated algorithmic solutions against accuracy, performance and efficiency criteria.

SELECTED PROJECTS

Pulse — Project Intelligence Agent

Pollion · AI agents · Project scoring · Client context

- Built an agent that reviews completed projects against delivery instructions, explains scoring findings and brings project history together to support client understanding and future delivery.

Gnomon — Team Operations Workspace

Pollion · Internal web app · Attendance · Reporting

- Built a shared workspace for attendance, working hours, breaks and time off, with employee and manager views and reports for day-to-day team coordination.

Lead-Generation Automation

Pollion · n8n · APIs · Enrichment · Verification

- Connected company research, contact enrichment, verification, deduplication and ranked output in an automated workflow. The shared project case study reports research capacity increasing from 800 to 4,200 companies per week.

SELECTED PROJECTS — CONTINUED

Bank Statement Reconciliation Bot

UiPath Studio · Document Understanding · Excel Automation · SMTP

- Reconciled PDF bank transactions with Excel records, detecting mismatches and duplicates. Automated discrepancy reports and email alerts with error handling and retries, reducing reconciliation time by approximately 80%.

Omni-Channel Banking Integration Hub

IBM ACE v12/v13 · API Connect · DataPower · IBM MQ · Apache Kafka

- Connected ATM, mobile and web channels using ESQL and REST-to-SOAP transformations, with authentication, transport security, transactional messaging and event-driven routing.

Stroke Severity Prediction — Earlier Data-Science Work

Python · XGBoost · SHAP · LIME · Gradio

- Built an end-to-end ML pipeline with 96.3% XGBoost accuracy, SHAP/LIME interpretability and an interactive Gradio application; reduced prediction time by 40% through optimization.

TECHNICAL SKILLS

AI & prompting: AI fundamentals, prompt engineering, advanced prompt engineering, AI in business, AI content generation, open-source AI.

Agents & knowledge: AI agents, AI agent workflows, vector databases & RAG, custom AI workflows, agentic automation, human-in-the-loop.

Workflow automation: AI automation, n8n automation, APIs & webhooks, API & email integration, automation security, vibe coding, AI automation capstone development.

UiPath & RPA: UiPath automation, Excel & UI automation, Orchestrator, RE Framework, OCR & document processing, Document Understanding, AI agents with UiPath, attended/unattended bots.

Enterprise integration: Intelligent automation, enterprise automation, IBM ACE, API Connect, DataPower, IBM MQ, Apache Kafka, REST, SOAP, OAuth 2.0, TLS/SSL, mTLS, audit logging.

Data-science foundation: Python, SQL, ESQL, VB.NET, pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, XGBoost, LightGBM, SHAP, LIME, Power BI, Tableau.

Tools & data: Git, GitHub, Docker, CI/CD, AWS, Azure, GCP, Gradio, Streamlit, MySQL, PostgreSQL, Oracle SQL, MongoDB.

EDUCATION

Bachelor's Degree, Management Information Systems

Sep 2020 – Jun 2024

Advanced Academy · GPA: 2.9 / 4.0 · Grade: B

CERTIFICATIONS

Data Scientist — British Board (200 hours)

Associate Data Scientist in Python — DataCamp

Associate Data Analyst in SQL — DataCamp

Python Programming — Mosh

Data Scientist — Spark Institution (200 hours)

Data Analyst in Python — DataCamp

AI & Machine Learning — Sprints × Microsoft

Programming Using Python — Sprints × Microsoft

LANGUAGES

Arabic: Native · English: Professional working proficiency
